

AirMedia

Wireless Conferencing and Presentation

The Trend

Hybrid work creates the need for additional conferencing spaces

- Add additional conferencing spaces without exponential cost
- Create new spaces for video conferencing in non-traditional rooms
- Make it easy for employees to utilize

66%

want to use their own devices for meetings*

42%

of ideation and collaboration sessions are held in non-traditional spaces*

**Futuresource*

The Challenges or new needs

- Need to ensure every space is capable of presentation and conferencing
- Updating rooms must be easy
- Deliver better guest presentation experience

AirMedia

Designed for how we work today

Transform any space, such as a huddle room, lounge, or mixed-use room, into a high-quality collaboration space

- Wireless conferencing
- Wireless presentation

Wireless Conferencing

- Video conferencing using any device
- Flexibility to choose your own peripherals
- Room control capabilities

Control and
Management

Wireless Conferencing

- Deliver open platform conferencing to an organization
 - Switch from Teams, Zoom, Google Meet, or other platform on a single platform
- Streamline rooms with multiple devices and clean up disparate systems
- Add video conferencing to non-traditional rooms
 - No new wire pulls, perfect for retrofit installations or spaces where you cannot add wiring

Wireless Presentation – Old way/new way

Task	Old Way	AirMedia®	Benefit
Ad-hoc collaboration sessions	Search for the room with the right technology, make sure the right cables are available	Connect any device to the AirMedia® network or AirMedia® Connect Presentation Adaptor and begin presenting in any space with a display	Easier collaboration, reduced time looking for the right equipment
Guest Presentation	Guest downloads a software to their computer or need to ensure the right cable and connection is available in the meeting space	Connect AirMedia® Connect Presentation Adaptor to any USB-C device, click and present	Eliminate security risks with guest presenters, enables all guests to easily present without having to download software
Hybrid-Collaboration with Video conferencing	Find a room that supports video conferencing, choose who is the presenter, find the right cables, make sure audio and video are supported as well as conferencing solution	Wirelessly connect to room peripherals and start your meeting through any conferencing service	Bring wireless conferencing to any space without the need to reconfigure the entire room
Collaborate with multiple content sources	Continually switch between laptops or devices	AirMedia® Advanced Presentation enables up to 4 simultaneous screens for collaboration	Easily and efficiently collaborate across multiple content sources

AirMedia Product Information
