

RHOMBUS EUROPE

Excellence is in the details!

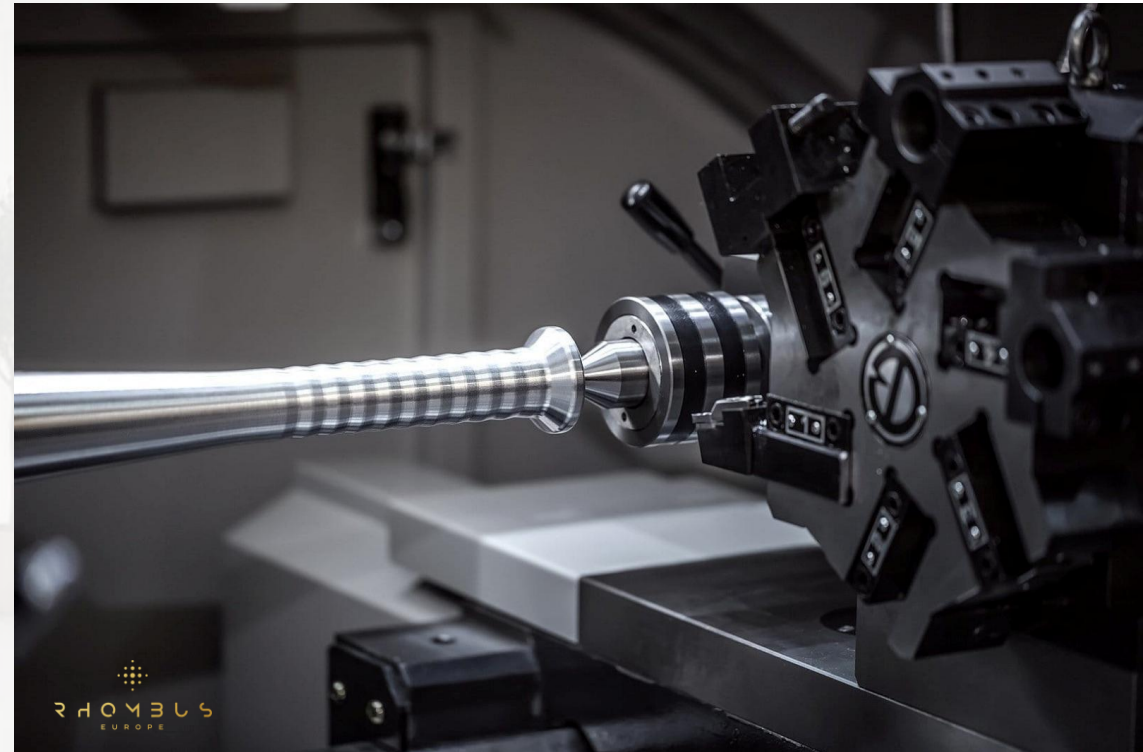

Who we are?

Rhombus Europe is a company specialized in **providing products** and **end-to-end solutions** for smart home automation, office buildings, hotels, and yachts, as well as in the **development** and **manufacturing** of high-end peripheral electrical devices – designer switches and sockets. From the initial concept and design, through development, implementation, and integration, to maintenance and upgrades, we cover the **entire process**, ensuring attention to every detail. Our mission is to transform technology into comfort and control for your life and business. We create **intelligent spaces** that adapt to our clients' lifestyles, enhancing comfort, security, and energy efficiency. We work with proven technologies and take an **individual approach** to each project to guarantee reliable and long-term solutions. **Rhombus** is more than technology – it is a partnership for a smart, connected, and sustainable way of living.

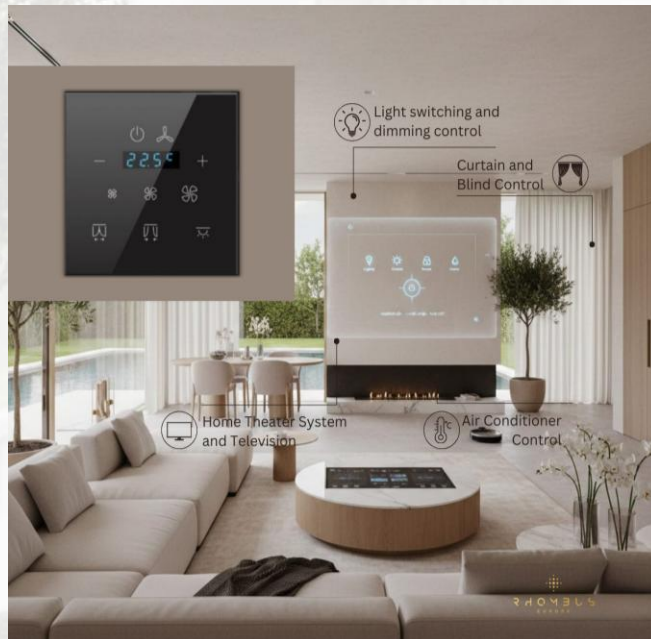

Why RHOMBUS?

- ❖ **Development** and **manufacturing** of a wide range of designer smart keypads and panels, tailored to the interior designer's specifications in terms of materials, dimensions, aesthetics, and visual identity.
- ❖ A complete automation system for residential and hospitality spaces, designed to deliver a luxury user experience.
- ❖ Full integration with world-class platforms such as **CRESTRON HOME** and **2N intercom** systems.
- ❖ A trusted provider of **GRMS** systems.
- ❖ Rhombus Europe successfully partners with and delivers solutions to global industry leaders such as **ASSA ABLOY**, **Dormakaba**, and **SALTO**.
- ❖ A modular system ranging from a basic **Smart Ready** solution to fully integrated smart systems.
- ❖ Easy to **scale**, **maintain**, and **update**.

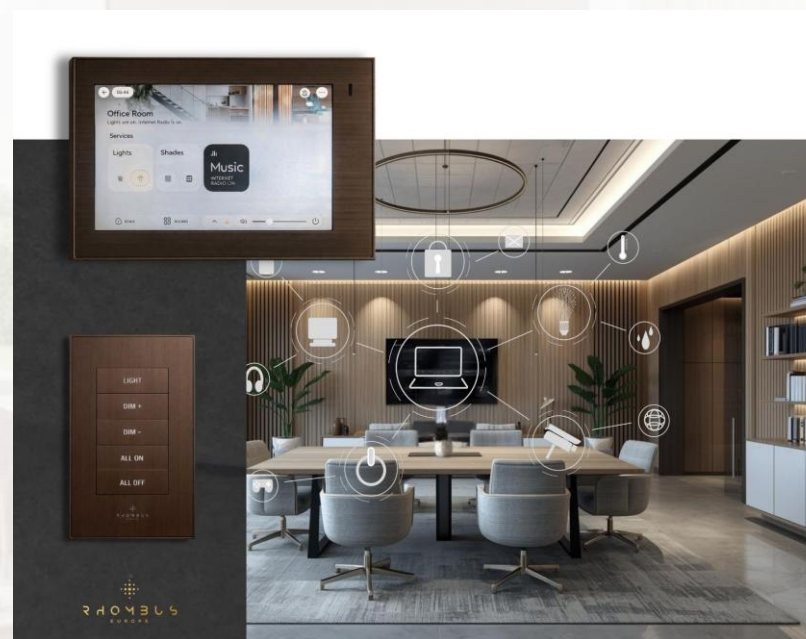

Automation solutions from A to Z

Home automation

Office automation

Hotel automation

Rhombus Europe provides software and hardware solutions for residential buildings, hotels, offices, conference rooms, and more. Our clients can rely on us for unlimited customization of functionalities, integration with various protocols such as Crestron, KNX, and Modbus, as well as integration with third-party devices. We also deliver full integration with PMS, BMS, and ACS systems.

Our process

1

Concept and planning

Our team will work with you to understand the needs and requirements of your space. We'll help you define which systems and functions you want to automate. We create a customized plan to fit your desires and budget.

2

Design and configuration

Once the concept is validated, our experts design and configure the system to accommodate the technical specifics of your home. This stage includes selecting devices and sensors, integrating with other systems and preparing for installation.

3

Installation and configuration

Our professional team will take care of the installation of all the equipment, making sure each device is functioning properly. We then program the system to adjust to your preferences and lifestyle.

4

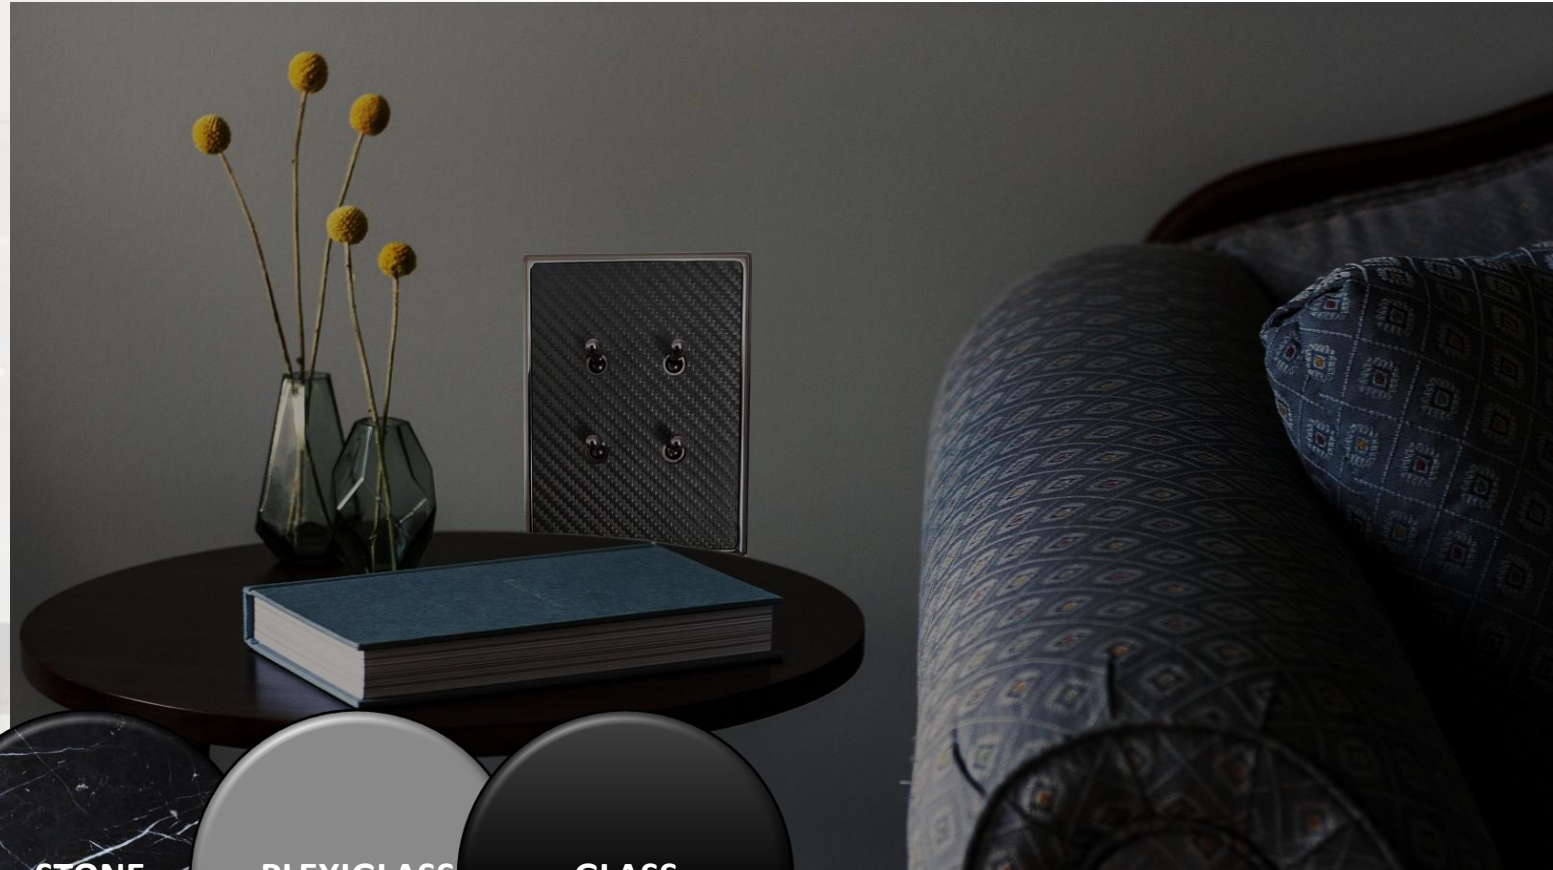

Tests and implementation

After the installation is complete, the system undergoes thorough testing to ensure everything works perfectly. You will receive detailed instructions on how to operate it, and our team remains available for any questions or additional adjustments.

Finishes

Unlimited customization of finishes

The company's core activity is the development and manufacturing of high-quality peripheral electrical devices. Our focus is on creating beautiful, customized switches and electrical accessories that highlight the individuality of your interior. Every project is special and unique - that is why we approach each one individually. We are proud to share that we work in collaboration with some of the world's leading interior designers and architects, consultants, operators, and construction companies. Clients can choose from our extensive range of finishes and combine them in a way that best reflects their style and vision.
